5. (Canceled).

6. (Canceled).

7. (Canceled).

8. (Previously presented) A method of updating content on a media player, the method comprising:

receiving a user input signal at the media player to identify a selection of content files;
accessing a database within the media player, wherein the database provides a list of
content files that includes identifiers of files not existing on the media player, the
selection of content files being associated with content files in the list;
connecting the media player to a source of content; and
executing at least one predefined rule to perform at least one operation on at least one
content file associated with the selection of content files.

9. (Original) The method of claim 8, wherein the source of content files is a media server.
